Bulletin #2014-006 27 – March - 2014

Subject:
Pistons in Super Production Class

Overview:

Effective immediately, the following rule changes are in effect.

1. Replace Article 10.2.B.5.c with the following.

   c. For Super Production vehicles, the following minimum weights apply:

   - 2002-2005 GD WRX = 3,125 lbs
   - 2006-2014 GD and GH WRX = 3,150 lbs
   - 2004-2014 GD and GH WRX STI (stock pistons) = 3,150 ~~3,200~~ lbs
   - 2004-2014 GD and GH WRX STI (alternate pistons) = 3,350 lbs
   - 2004-2014 Mitsubishi EVO = 3,175 lbs

   Except as indicated above (or as amended by Bulletin), there is no stated minimum weight for Super Production vehicles.

2. Add the following section to Article 10.2.B.

   x. Pistons

      a. Except as indicated below, only the use of stock pistons is permitted. Over-boring for the use of oversize pistons is prohibited.

      b. In Super Production vehicles, the following alternate piston is permitted.

         i. For use in a 2004-2014 GD or GH WRX STI, an alternate piston made by JE Pistons and identified by a Rally America logo and a serial number.

3. Replace Article 10.2.B.29 with the following.

29. Tolerances

All adjustment/machining must be at the manufacturer's specification and/or within the manufacturer's specified tolerances. ~~Over-boring for the use of oversize pistons is prohibited.~~

Rationale: This is a competitor requested change that has been on hold until a sufficient quantity of alternate pistons was available to supply all teams that wish to use it. The pistons are available for purchase only through Vermont Sports Car. The pistons' serial numbers will be recorded by JE Pistons and Vermont Sports Car.

Questions regarding this bulletin received by Rally America from licensed Drivers and Co-Drivers will be answered in writing.
